

## BARE ROOT TREE PLANTING ESSENTIALS

Don't plant the tree too deep

Never cover the root flare with soil

### 6 KEY STEPS FOR SUCCESS

1. Dig a **WIDE & SHALLOW HOLE** about 1 foot deep and 4 feet wide
2. Set stakes before setting the tree
3. **BE GENTLE** with the roots and trunk
4. Set the tree straight & **NOT TOO DEEP!** keep the root flare visible above soil. Step back and look at it.
5. **ASK your LEAD PLANTER to CHECK & APPROVE** the depth & straightness of the tree **BEFORE YOU PUT SOIL BACK** into the hole
6. If compost is at the site, mix it into the soil before filling the hole
